ACADEMIC POSITIONS

- **Assistant Professor of Economics** • FGV EPGE • 2023–Present

EDUCATION

- **PhD in Economics** • New York University • 2017–2023
Dissertation title: *Essays in Macroeconomics and Monetary Economics*
Advisors: Virgiliu Midrigan, Thomas Sargent, Ricardo Lagos
- **MA in Economics** • PUC-Rio • 2015–2017
Advisors: Tiago Berriel, Carlos Carvalho
- **BA in Economics** • FGV-EESP • 2009–2014

WORKING PAPERS AND RESEARCH IN PROGRESS

- **Unequal Business Cycles**
Standard incomplete-markets (SIM) models predict that the consumption of low-skilled households is more cyclical relative to the consumption of high-skilled because they hold fewer liquid assets and experience larger income changes. I use the Consumer Expenditure Survey (CEX) to show that the opposite is true in the data: lower-skilled households experience smaller consumption changes over the business cycles. I also show that this difference in consumption cyclicalities is explained by the fact that high-skilled households consume relatively more luxuries. Motivated by these facts, I extend the SIM model to allow for non-homothetic preferences over goods, which I discipline using cross-sectional data on how consumption shares of luxuries and necessities vary with income (Engel curves). The model reproduces the observation that consumption is more cyclical for high-skilled households because they spend a larger share of their income on luxuries, which are easier to substitute over time. The model also predicts that the welfare costs of recessions are larger for low-skilled households, despite their lower consumption declines.
- **Cyclical Employment Inequality**
- **Monetary Policy Shocks and Redistribution across Income Groups**
- **Government Debt, Fiscal Rules, and Monetary Policy Transmission**
- **Multiple Currencies and Limits to Seigniorage**

TEACHING

- Topics in Monetary Economics • Graduate • FGV EPGE • 2024, 2025
- Macroeconomics I • Graduate • FGV EPGE • 2024, 2025

- Modern Macroeconomics • Undergraduate • FGV EPGE • 2025
-

FELLOWSHIPS AND AWARDS

- Federal Reserve Board • Dissertation Fellowship • 2022
 - New York University • MacCracken Fellowship • 2017–2022
-

SEMINAR PRESENTATIONS

- 2022 • Fed Board, New York University
 - 2023 • PUC-Rio, FGV EESP, Insper, FGV EPGE, Nova Lisboa, LuBraMacro, Ohio State University
 - 2024 • LuBraMacro
 - 2025 • SED meeting, BCB Seminar, Annual Conference of the Banco Central do Brasil
-
